

Jenkins - Windows installation

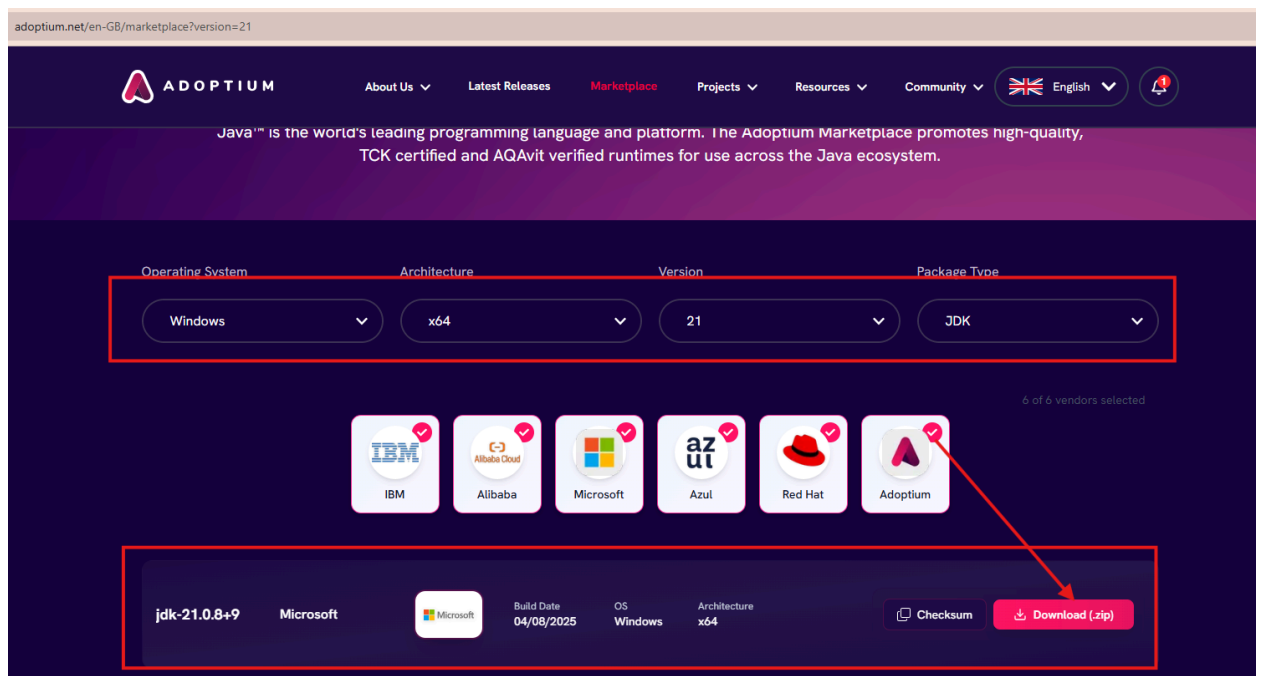

Pre-check:

1. Check if you have Java 17 or 21 installed.(At the time of this installation Jenkins needs one of these version)
2. Open Command Prompt -> Windows Key + CMD

```
C:\Users\copea>java -version
java version "1.8.0_461"
Java(TM) SE Runtime Environment (build 1.8.0_461-b11)
Java HotSpot(TM) Client VM (build 25.461-b11, mixed mode)
```

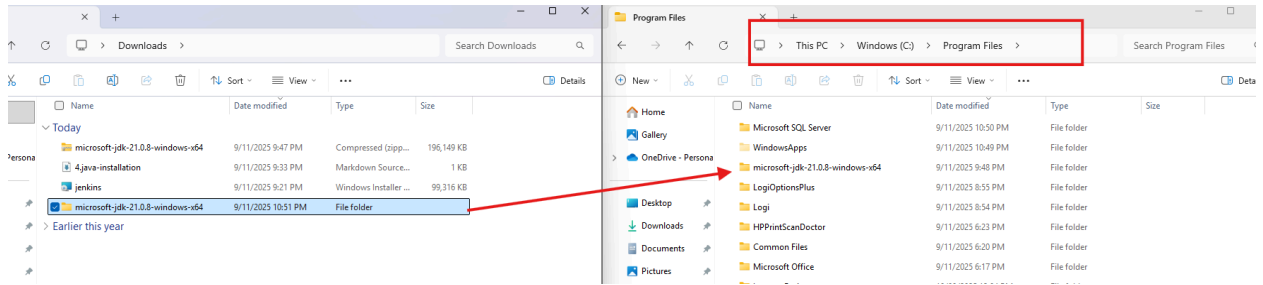

a.

3. If you have older version as above like Java 8, then it's time to install the latest one
4. Go to: <https://adoptium.net/en-GB/marketplace>
5. Select the version 21 and download and install

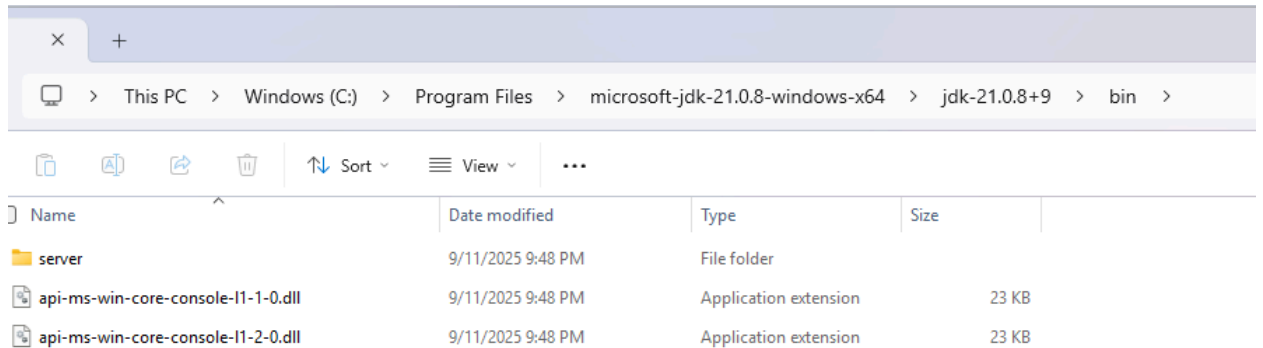

a.

6. You will see a .zip file downloaded
 - a. Right Click -> Extract All -> Copy the extracted folder to C:\Program Files or other locations as you preferred

b.

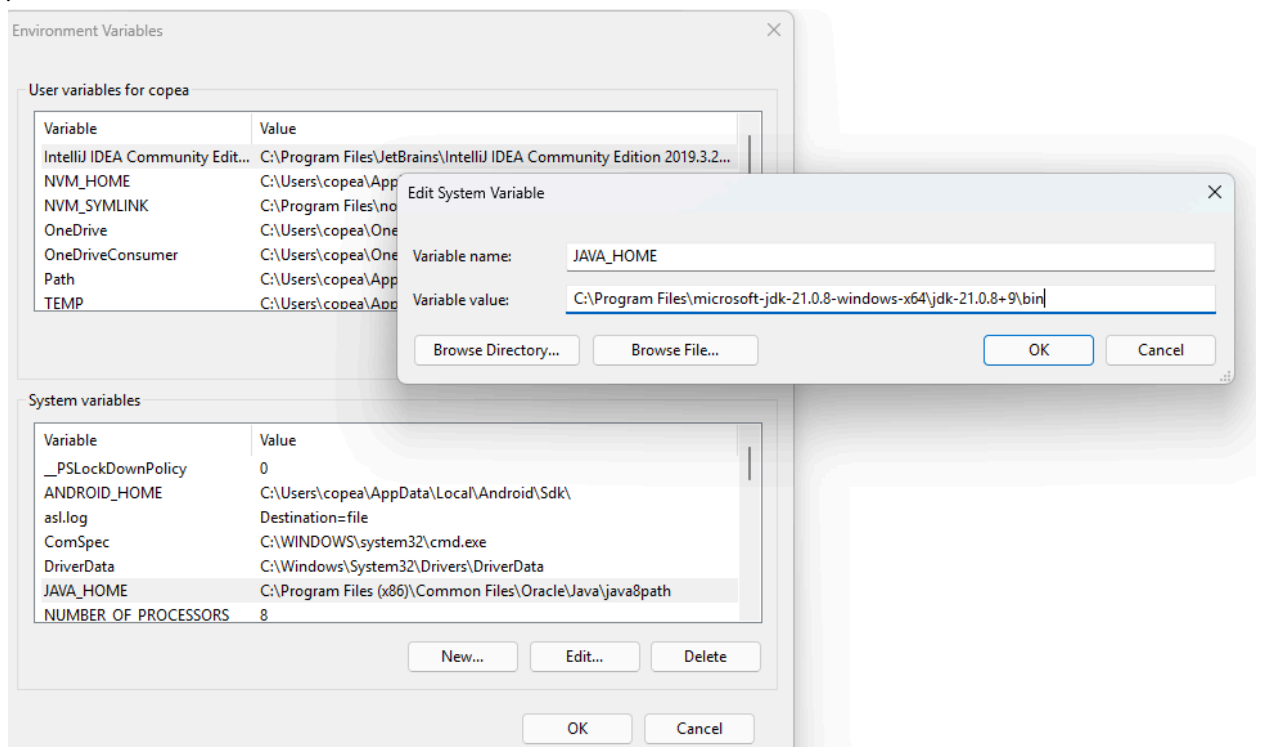

7. Navigate to the `bin` directory and copy the path

a.

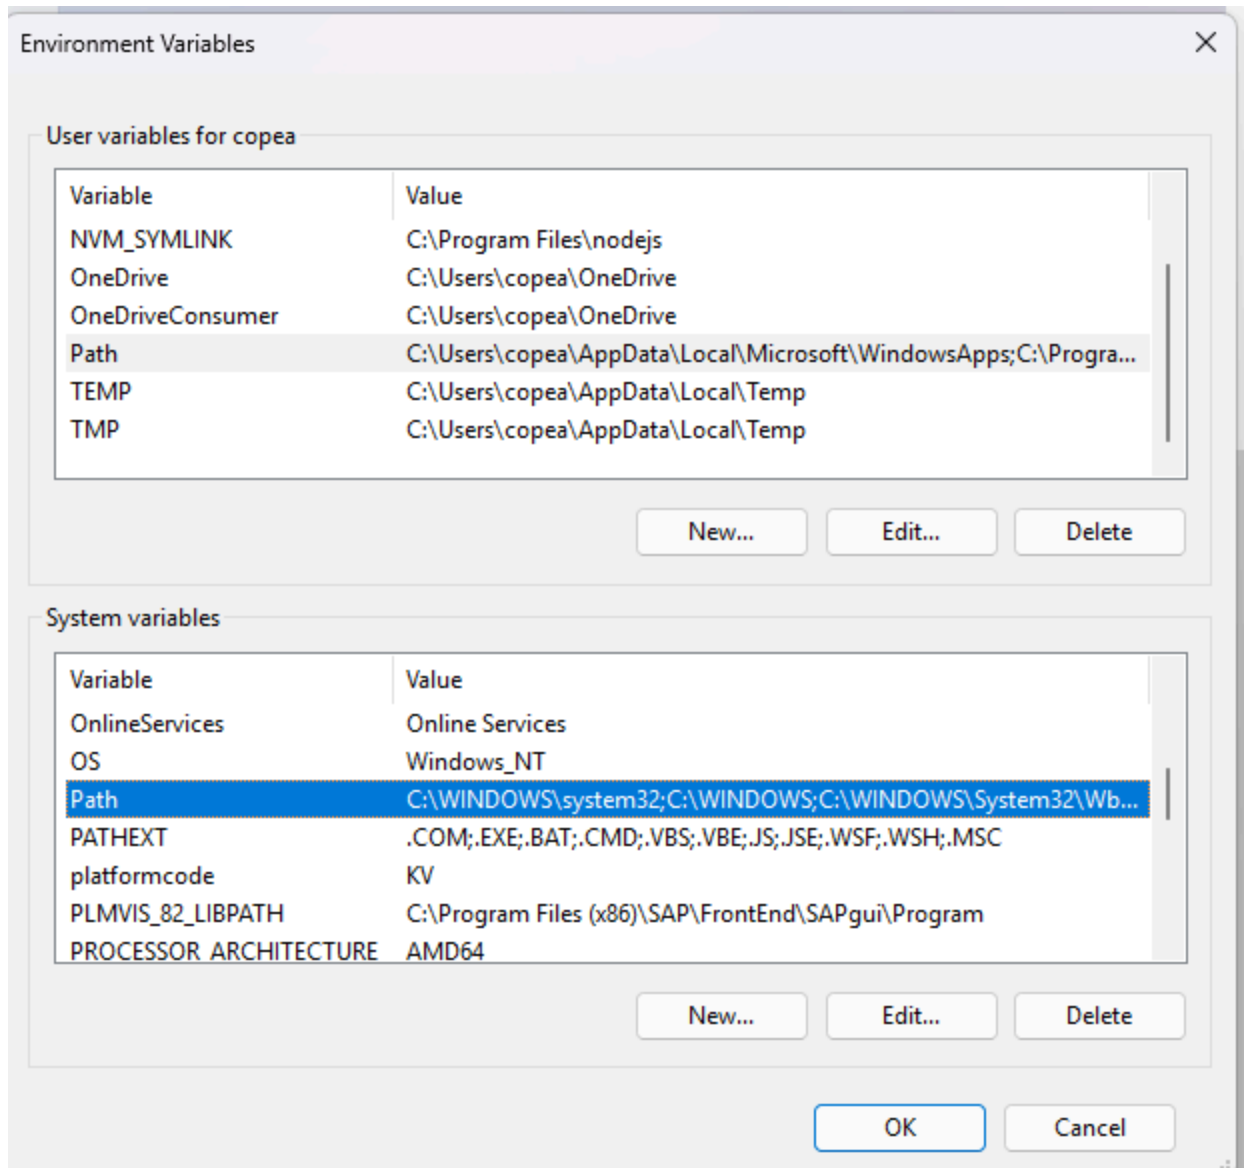

8. Set the path as Environment Variable as `JAVA_HOME`

a. *Windows Key -> Edit System Variable -> (or if you can set that as User variable too if you don't have access)*

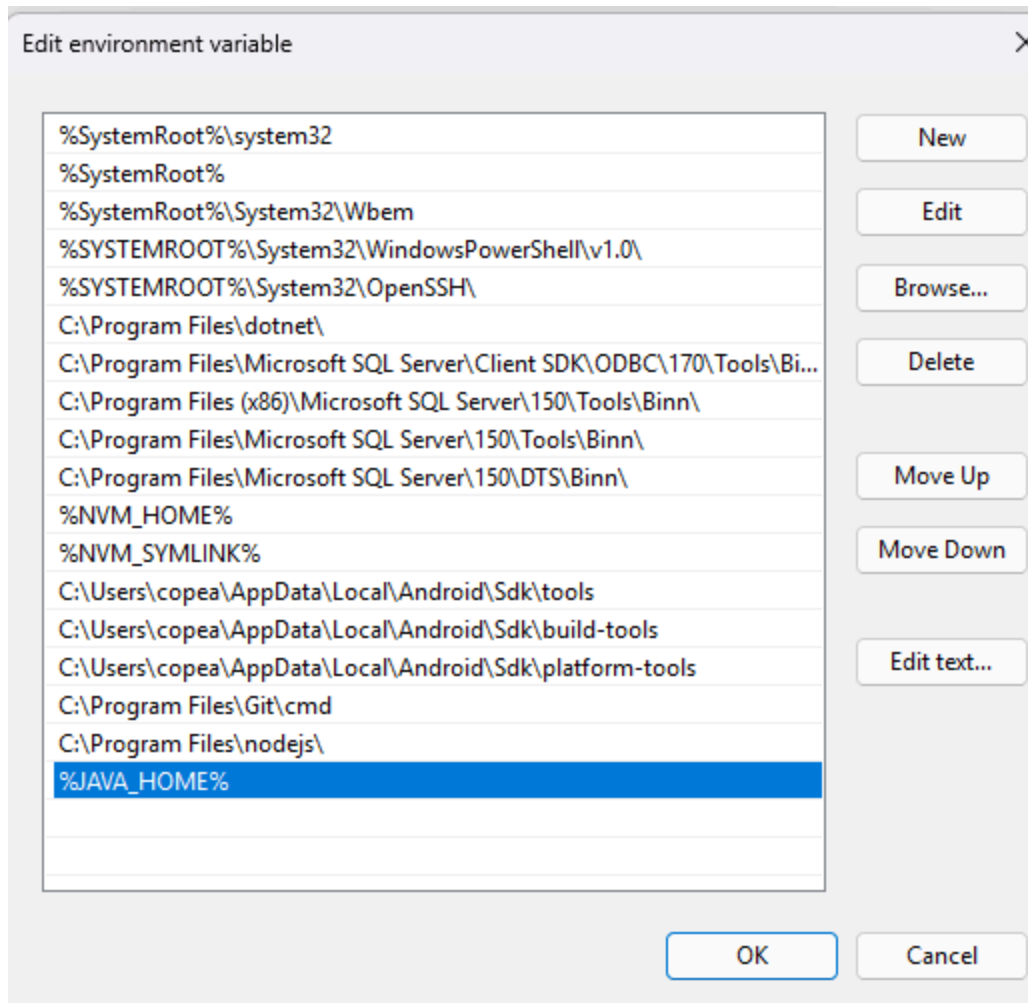

b.

c. Now click on path as below

- d.
- e. Remove any old JAVA path and update as below

f.

9. Close all command prompt window and open again

- a. `java -version` → Should return the installed java version
- b. `where java` → Should return the installation path

```
C:\Users\copea>java -version
openjdk version "21.0.8" 2025-07-15 LTS
OpenJDK Runtime Environment Microsoft-11933218 (build 21.0.8+9-LTS)
OpenJDK 64-Bit Server VM Microsoft-11933218 (build 21.0.8+9-LTS, mixed mode, sharing)

C:\Users\copea>where java
C:\Program Files\microsoft-jdk-21.0.8-windows-x64\jdk-21.0.8+9\bin\java.exe

C:\Users\copea>
```

c.

10. Java Installation is now completed!

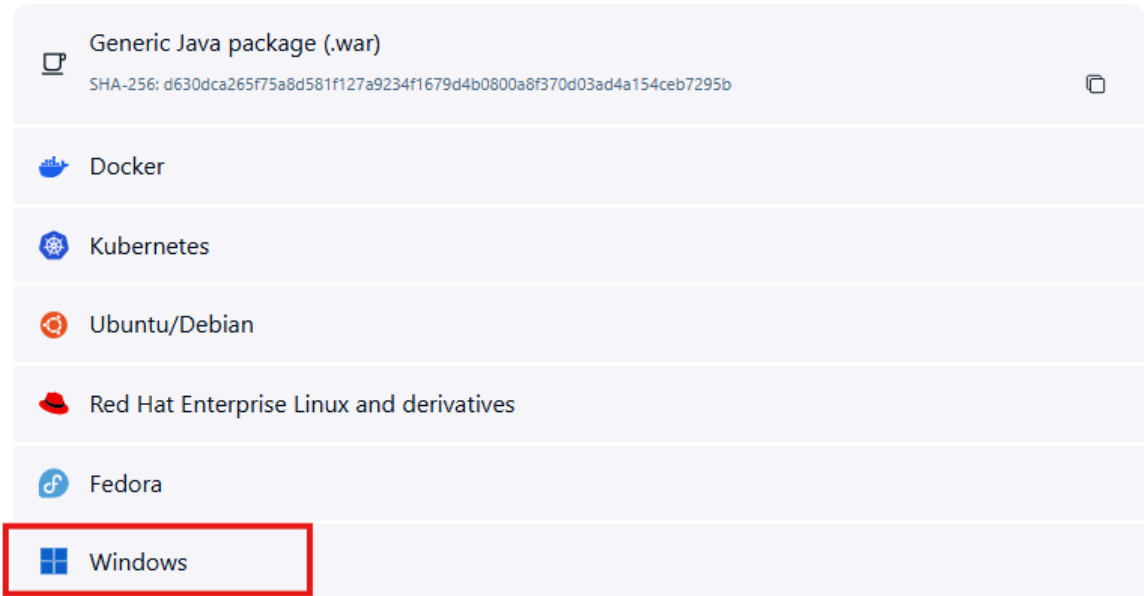

Install Jenkins

11. Go to: <https://www.jenkins.io/download/>
12. Click on the **Windows** installer

3. Once a Jenkins package has been downloaded, proceed to the [Installing Jenkins](#) section of the U:
4. You may also want to verify the package you downloaded. [Learn more about verifying Jenkins dc](#)

Download Jenkins 2.528.1 LTS for:

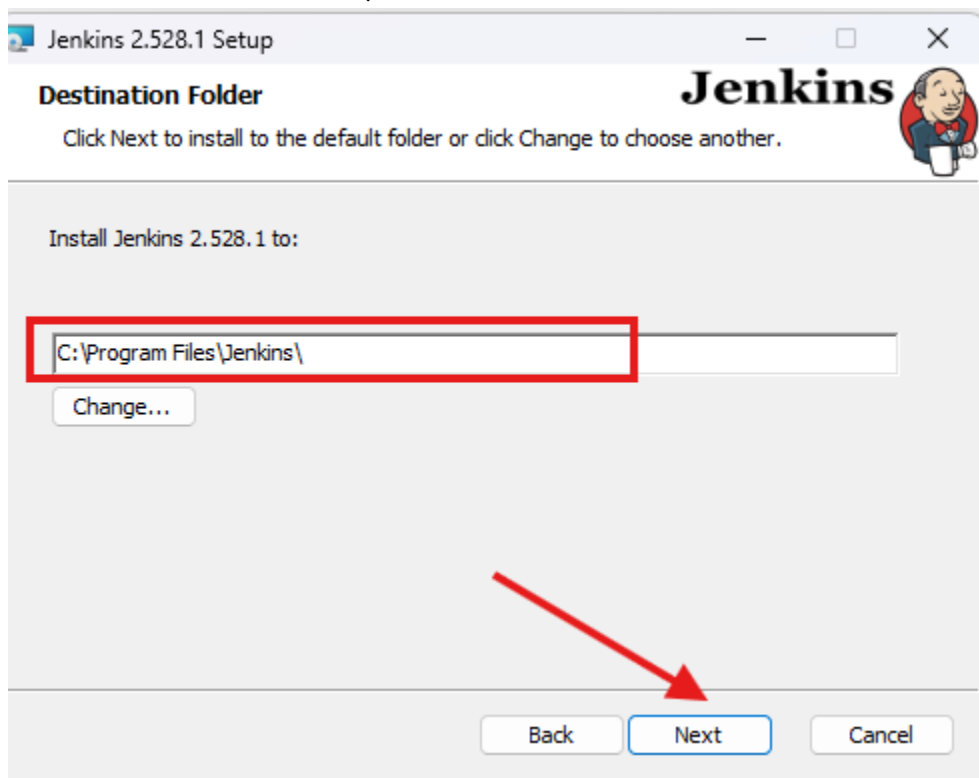

a.

13. Run the installer(**.msi** file) once downloaded (takes about a min)

a.

b. Make a note of the install path

c.

Jenkins 2.528.1 Setup

Service Logon Credentials

Enter service credentials for the service.

Jenkins 2.528.1 installs and runs as an independent Windows service. To operate in this manner, you must supply the user account credentials for Jenkins 2.528.1 to run successfully.

Logon Type:

☒ Run service as LocalSystem (not recommended)

☐ Run service as local or domain user:

Instance Configuration

Jenkins URL:

The Jenkins URL is used to provide the root URL for absolute links to various Jenkins resources. That means this value is required for proper operation of many Jenkins features including email notifications, PR status updates, and the `BUILD_URL` environment variable provided to build steps.

The proposed default value shown is **not saved yet** and is generated from the current request, if possible. The best practice is to set this value to the URL that users are expected to use. This will avoid confusion when sharing or viewing links.

Jenkins 2.528.1

Not now

Save and Finish

f.

Getting Started

Jenkins is ready!

You have skipped the **setup of an admin user**.

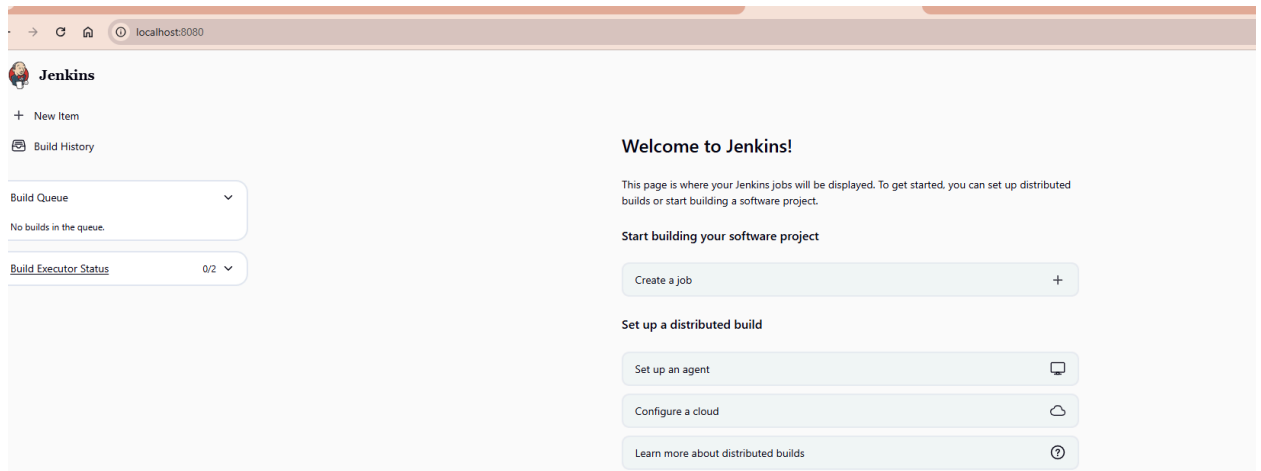

To log in, use the username: "admin" and the administrator password you used to access the setup wizard.

Your Jenkins setup is complete.

Start using Jenkins
